

CIS 497 Senior Project

REACH OUT SOUTH

SPRING 2018

Melissa Smith

Instructor

University of South Alabama

Asbjorn Burns

Outreach Specialist

University of South Alabama

Jeffrey Haller

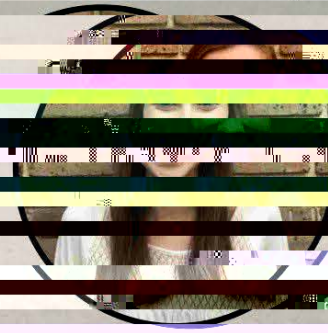

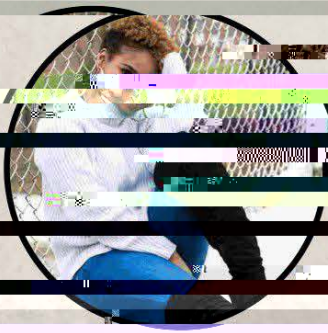

Instructor

University of South Alabama

University of South Alabama

School of Computing

The SoC Outreach staff does not have an efficient way of both promoting and maintaining student information. We will be creating a more efficient way to collect and maintain information on the student. SoC also wants to establish a connection with the students that have a potential interest in the School of Computing by sending them an email that is showing that they are interested in their student. An application/database will be used to collect, store, and modify student information, while also notifying the staff of potential students who have shown an interest in the SoC. It will also notify the student or staff when there is an upcoming event.
